DIMM

INSTALLATION GUIDE

Preparation

For safe operation, see "Safety information", *Setup Guide*.
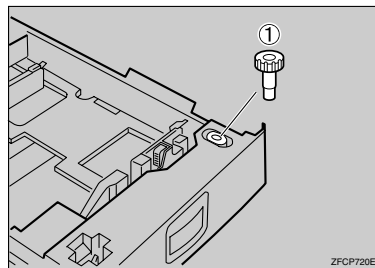

⚠ *CAUTION:*

- *Do not touch the inside of the printer board compartment. It may cause a machine malfunction or a burn.*

Important

❒ Before touching the DIMM, touch something metal to discharge any static electricity. Static electricity can damage the DIMM.
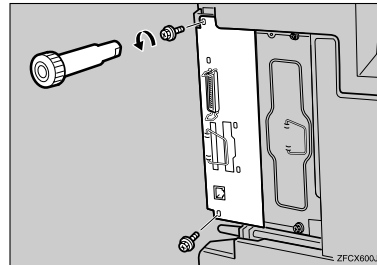

Installing the DIMM

1 **Turn off the power.**

2 **Unplug the power cord, and then disconnect the interface cable.**

3 **Pull out the first paper tray (Tray 1) and take the screwdriver (①) from the tray. Each screw to be removed requires this screwdriver.**

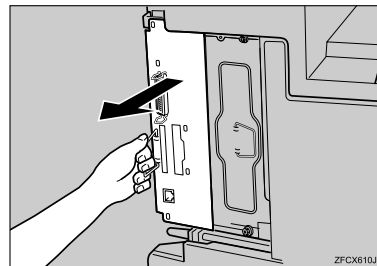

4 **Remove the two screws that fasten the printer board in place.**

The removed screws will be used in step **9** to fasten the printer board again.

**5** **Hold the handle and carefully pull out the printer board.**

**6** **Put the printer board on a flat surface.**

7 Insert the DIMM into the slot, and push it down until it clicks. If the DIMM is not set in the correct way it does not click.

ZFCP201E

8 Align the printer board with the top and bottom rails in the printer, and then slide in the printer board slowly until it stops.

ZFCX630J

9 Fasten the printer board with the two screws you removed in step **4**.

ZFCX602J

10 Attach the interface cable, and then plug in the power cord.

11 Turn on the power.

Note
❒ Be sure to return the screwdriver to the paper tray after using it.
❒ After finishing installation, print the configuration page from the "List/Test Print Menu" to confirm that the DIMM is installed properly. See "List/Test Print Menu", *Printer Reference*, on the CD-ROM labeled "Operating Instructions".
