DIMM

INSTALLATION GUIDE

📖 Preparation

For safe operation, see ″Safety Information″, *Maintenance Guide.*

⚠ *CAUTION:*

• *Do not touch the inside of the controller board compartment. It may cause a machine malfunction or a burn.*
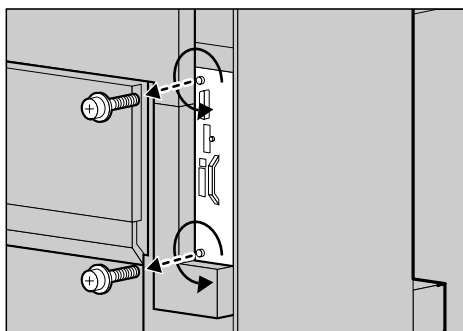

🕸Important

❐ Before touching the DIMM, touch something metal to discharge any static electricity. Static electricity can damage the DIMM.

Installing the DIMM

A **Turn off the power.**

B **Unplug the power cord, and then disconnect the interface cable.**

C **Remove the two screws that are fastening the controller board on the back of the printer using provided screwdriver.**
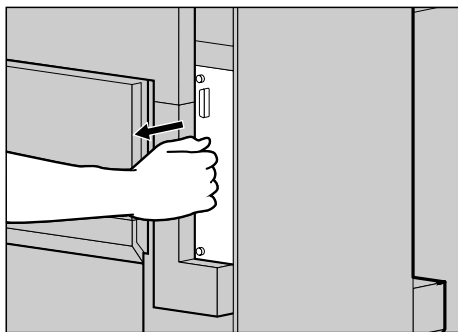

🔍Reference

See ″How to Use the Screwdriver″, *Setup Guide.*

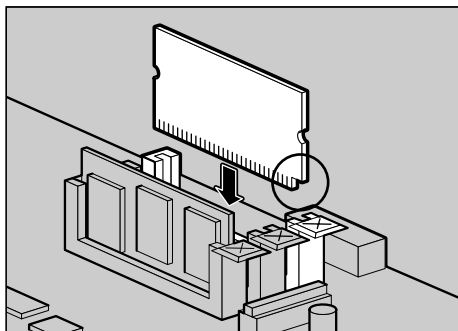

ZDJP025J

The removed screws will be used in step **H** to fasten the controller board.

**D** **Holding the handle, pull out the controller board slowly.**

ZDJP026J

E **Put the controller board on a flat surface.**

F **Insert the DIMM into the slot, and push it down until it clicks. If the DIMM is not set in the correct way, it does not click.**

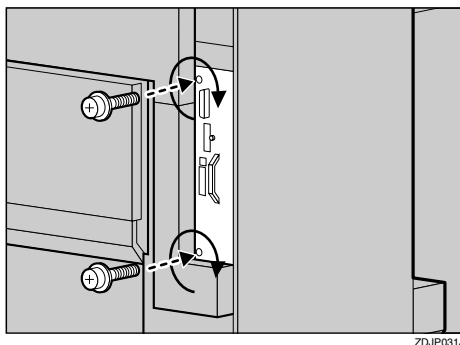

ZDJP032E

7 **Adjust the controller board to the top and bottom rails, and then push in slowly until it stops.**

ZDJP030J

⚠️**Important**

❒ The printer may not work properly if the controller board is not set properly.

8 **Tighten the two screws that you removed in step 3 to fasten the controller board back into its original position using provided screwdriver.**

ZDJP031J

📎 **Note**

❒ Be sure to return the provided screwdriver to its original position on the inside of the front cover.

9 **Attach the interface cable, and then plug in the power cord.**

10 **Turn on the power.**

📎 **Note**

❒ After finishing installation, print the configuration page from the "List/Test Print Menu" to confirm that the DIMM is installed properly. See "List/Test Print Menu", *Administrator Reference*, on the CD-ROM labeled "Operating Instructions".
