Printing with FollowMe and VPSX

VPSX Server (2)

FollowMe Q-Server (2/3)

User Workstation (1)

User Presents ID at ID Reader (3)

Printer (4)

Users print from their workstation (1), into their personal print queue on the VPSX Server (2), where their documents are held awaiting their release. Users then simply walk to their choice of printer or MFP where they authenticate themselves via card swipe or PIN (3), and the documents follow them to the device (4).
